# Abu Zain

**Contact**: +92-3144832432 , zainbinramzan@gmail.com | **Address**: Pakistan, Bahawalpur, Punjab

## EDUCATION

**Islamia University Bahawalpur**

Bachelor of Science - IT, Information technology

## WORK EXPERIENCE

**Enigmatix** | *Frontend Developer*      **On Site Bahawalpur**   *Jan 2021 - Jun 2023*

- Developed dynamic user interfaces using HTML, CSS, JavaScript, React, MobX, TypeScript, Redux, and Ant Design.
- Contributed to the OMS project, a scalable internal management system used by thousands of employees, investors, and clients.
- Utilized React and MobX to develop features and wrote test cases with Jest to ensure code quality.
- Created reusable components, removing 10–20 redundant files and hundreds of duplicate lines of code, enhancing project efficiency and maintainability.

**Devticks** | *Fullstack Developer*      **Hybrid Bahawalpur**   *Jan 2023 - Aug 2023*

- Designed and implemented front and backend components using React, Next.js, Node.js, and TypeScript.
- Redeveloped the home page and products page, resulting in a 10% increase in sales.
- Authored comprehensive API documentation using Swagger for 10 new endpoints, leading to a 25% reduction in onboarding time for frontend developers and improved collaboration across teams, enhancing overall productivity.
- Improved the 'Add to Cart' feature with React Query and optimistic updates, reducing perceived wait time by 200ms for a seamless experience regardless of internet speed.
- Designed and implemented comprehensive test cases for critical workflows, including login, signup, and checkout, using Playwright to ensure seamless functionality and end-to-end system reliability.

**Muuve** | *Frontend Developer*      **Remote**   *Aug 2023 - Present*

- Designed and developed features for the Muuve official site using React, Next.js, Tailwind CSS, and integrated Google Maps and Paystack APIs.
- Achieved a 17% performance improvement by leveraging React memorization techniques.
- Implemented Next.js dynamic imports, reducing initial page load times by 10%.
- Integrated AWS S3 for efficient file upload and media management, enhancing scalability and storage efficiency.

## PROJECTS

**Pafyll** | *FullStack Developer*      **At Devticks**   *Jan 2023 - Aug 2023*

- An e-commerce platform developed for a Norwegian company
- Redesigned the homepage UI and revamped the products page to improve user experience.
- Added a contact page to enhance user interaction and engagement.
- Utilized Playwright for end-to-end testing to ensure seamless functionality and reliability.
- Visit the platform: Pafyll

**OMS** | *Frontend Developer*      **At Enigmatix**   *Jun 2021 - Jan 2023*

- Developed an internal management system for Enigmatix that enhanced operational efficiency, enabling seamless tracking of 50+ projects simultaneously while eliminating bottlenecks in workflow processes and improving team communication.
- Utilized React, Mobix, CSS, And CSS modules enabling efficient data handling and responsive UI updates.
- Visit the system: oms.enigmatix.co.

**Muuve** | *Senior Frotnend Developer*      **At Muuve**   *Aug2023 - Present*

- A real estate marketplace operating in South Africa and Switzerland.
- Implemented browsing functionality for residential and commercial listings, similar to Apartments.com.
- Integrate Google Maps, Paystack, Samsub (KYC), and Google Places APIs.
- Launched a sophisticated property search interface that supported over 1,000 simultaneous users daily.
- Engineered a comprehensive dashboard from the ground up for agents, tenants, and landlords, streamlining functionality and enhancing user experience; the design led to a 50% increase in daily user engagement across all user types

## SKILLS

HTML, CSS, Javascript, Typescript, Tailwind CSS, Node, React, Express JS, MongoDB, Antd, Next js, Jest, E2E, Vercel, Git, Github, Playwright, ShadeCN, Vite, Swagger, Axios, Redux, React Query, Redux Toolkit, Passport js, PostgresSql, KYC, Samsub, Stripe
